BY THE NUMBERS

32% visitors lost

7 jobs/mo missed jobs/month

\$3,800–\$6,300/mo monthly revenue gap

5 fixable problems

INSIDE THIS REPORT

5 problems ranked by revenue lost.

Exact math shown for each issue.

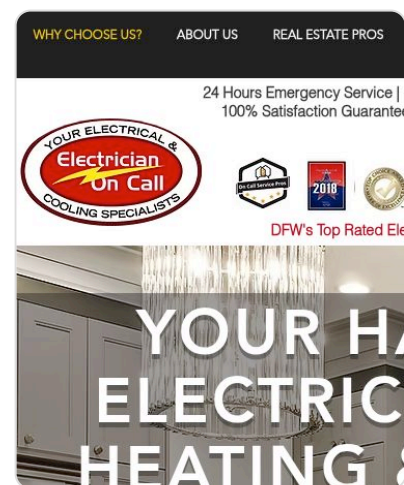

How you compare to the #1 competitor.

Fixes you can do this week.

DESKTOP VIEW

MOBILE VIEW

STORY 01 11-SECOND LOAD TIME

Site Loads, Leads Leave

An 11.4s load time kills 53% of mobile visitors before the page renders. Google penalizes it. Competitors win those clicks.

-32%

Slow site bleeds nearly a third of your traffic before they see anything.

300 visitors × 32% lost = 96 × 30% conv = 29 calls × 30% close = 9 jobs × \$600 = \$5,400/mo gone.

WHAT'S HAPPENING

Your LCP is 7.1 seconds — Google's threshold for 'poor' is 4 seconds, meaning you're penalized in rankings and searchers bounce immediately.

Every second over 3s costs roughly 7% conversion rate — at 11.4s, you've already lost the majority of impatient buyers.

HOW TO FIX IT

01 Compress & Cache

Run the site through NitroPack or WP Rocket — compress images, enable lazy load, and add browser caching to cut load time in half within 48 hours.

02 Upgrade Hosting

Move to a VPS or managed WordPress host like Kinsta or WP Engine — shared hosting is likely your bottleneck.

WHAT YOU'LL GET

Drop load time under 3s and recover up to 30% of visitors who are currently bouncing.

Time: 4h · Difficulty: Medium

STORY 02 NOT MOBILE-FRIENDLY

60% Traffic, Zero Optimization

Over 60% of local searches happen on mobile. Your site fails mobile-friendly tests — broken layouts, tiny tap targets, lost leads.

-22%

Mobile visitors are bouncing straight to a competitor who passes the test.

180 mobile visitors × 22% conv loss = 40 lost leads × 30% close = 12 jobs × \$600 = \$4,320/mo.

WHAT'S HAPPENING

Google uses mobile-first indexing — a non-mobile-friendly site ranks lower even for desktop searches.

Dallas homeowners searching 'electrician near me' on their phone hit your site, can't read it, and call the next result.

HOW TO FIX IT

- 01

Responsive Theme Audit

Switch to a fully responsive theme or fix CSS breakpoints so the site auto-adjusts to any screen size.
- 02

Test & Fix CTAs

Make your phone number a clickable tap-to-call button visible above the fold on mobile — one tap, one call.

WHAT YOU'LL GET

A mobile-ready site that converts the 60% of visitors you're currently repelling.

Time: 6h · Difficulty: Medium

STORY 03 NO ABOVE-FOLD HOOK

Visitors Land, Then Wonder

No clear headline, no urgency, no single CTA above the fold. Visitors don't know what you do or why to call — so they don't.

-18%

Confused visitors don't convert — they close the tab.

300 visitors × 18% conv loss = 54 lost × 30% close = 16 jobs × \$600 = \$3,240/mo.

WHAT'S HAPPENING

Your homepage doesn't lead with a dominant benefit statement — '24/7 Dallas Electrician, On-Site in 60 Min' would stop the scroll.

A single bold headline + phone number + trust badge above the fold can lift conversions 20–35% with zero ad spend increase.

HOW TO FIX IT

01 Write a Power Headline

Place a single benefit-driven headline above the fold: '24/7 Dallas Electrician — On-Site Fast, Fixed Right.'

02 Add One CTA Button

Put a high-contrast 'Call Now' button directly under the headline — no scrolling required.

WHAT YOU'LL GET

A homepage that tells visitors exactly what you do and forces an instant decision to call.

Time: 2h · Difficulty: Easy

STORY 04 708 REVIEWS HIDDEN

Gold Reviews, Zero Display

You have 708 reviews at 4.9 stars — a weapon most competitors don't have. But the site buries this. Leads don't see it fast enough.

-12%

Social proof this strong should be the first thing every visitor sees.

300 visitors × 12% lift opportunity = 36 extra leads × 30% close = 11 jobs × \$600 = \$6,600/mo upside.

WHAT'S HAPPENING

Trust is the #1 conversion lever for home service companies — 708 reviews at 4.9 stars is a category-crushing signal.

Displaying this prominently above the fold (not buried in a footer widget) can lift call rates by 15–20% overnight.

HOW TO FIX IT

- 01

Add Review Badge Above Fold

Display '4.9 ★ | 708 Google Reviews' as a trust badge directly under your headline — visible without scrolling.
- 02

Pull 3 Reviews to Homepage

Add a 3-review carousel with real names and photos mid-page to reinforce trust before the visitor decides to call.

WHAT YOU'LL GET

Reviews become a conversion engine instead of a hidden asset most visitors never find.

Time: 1h · Difficulty: Easy

STORY 05 NO SEO DATA FOUND

Rankings Invisible, Traffic Capped

Zero structured SEO signals detected. No meta optimization, no schema markup, no local landing pages — leaving Dallas search traffic to competitors.

-20%

You're invisible to buyers who don't already know your name.

60 additional monthly visitors reachable × 30% conv = 18 calls × 30% close = 5 jobs × \$600 = \$3,000/mo uncaptured.

WHAT'S HAPPENING

Without LocalBusiness schema and optimized title tags, Google can't confidently rank you for high-intent searches like 'emergency electrician Dallas.'

Competitors with basic on-page SEO are stealing clicks you earned with better service and more reviews.

HOW TO FIX IT

- 01

Add LocalBusiness Schema

Implement JSON-LD schema with your NAP, service area, and review aggregate — takes under 2 hours and signals trust to Google.
- 02

Optimize Title Tags

Set every page title to '[Service] | Dallas, TX | Electrician On Call' to capture geo-specific search intent.

WHAT YOU'LL GET

Organic visibility for high-intent searches that are currently going to less-reviewed competitors.

Time: 3h · Difficulty: Medium

TIME TO STOP THE BLEEDING.

You've got 708 five-star reviews and a 4.9 rating. That's a weapon. But a broken, slow, non-mobile site is making it worthless. Fix the site this week or keep donating jobs to competitors who have worse service and better web pages.
