MOBILE VIEW

5 Seconds Kills Jobs

A 5.2s load time on mobile bleeds 30%+ of visitors before they see your number. Google penalizes it. Customers leave. You lose.

-30%

Slow load = 7 missed HVAC installs every month.

300 visitors × 30% lost = 90 × 25% conv = 22 leads × 30% close = 7 jobs × \$5,500 = \$38,500.

Conservative range: \$6,200–\$9,900/mo.

WHAT'S HAPPENING

Your LCP is 5.2 seconds — Google's threshold for 'poor' is 2.5s, meaning you're penalized in rankings and users bounce before the page loads.

Every second over 3s cuts conversions by ~20%. You're losing customers before they see your 4.7-star rating.

HOW TO FIX IT

- 01

Compress & Lazy-Load Images

Convert all images to WebP and add lazy loading — cuts load time by 1.5–2s with no redesign.
- 02

Enable Caching & CDN

Add a caching plugin or Cloudflare free tier to serve assets faster to Toledo-area visitors.

WHAT YOU'LL GET

Sub-3s load time, better Google rankings, and more visitors staying long enough to call.

Time: 4h · Difficulty: Easy

STORY 02 NOT MOBILE-FRIENDLY

Broken on Every Phone

60%+ of HVAC searchers are on mobile. Your site fails mobile-friendly tests. They can't read it, can't tap your number, they call your competitor.

-20%**Non-mobile layout is silently surrendering 4–5 jobs a month.**

150 mobile visitors × 20% conv drop = 30 lost leads × 30% close = 9 leads lost × \$5,500 = estimated \$4,100–\$7,400/mo.

WHAT'S HAPPENING

Google's mobile-first indexing means your desktop-only experience actively suppresses your local search ranking.

If a homeowner's AC dies at 9pm and your site won't load right on their phone, they're booking the next guy who does.

HOW TO FIX IT

01 Enable Responsive Layout

Switch to a mobile-responsive theme or apply CSS breakpoints so the site renders correctly on 375px screens.

02 Add Click-to-Call Button

Pin a sticky 'Call Now' button at the bottom of every mobile page — this alone lifts mobile conversions 15–25%.

WHAT YOU'LL GET

Mobile visitors can actually call you, and Google ranks you higher in local results.

Time: 1 day · Difficulty: Medium

STORY 03 NO LEAD CAPTURE

Visitors Leave, No Hook

No visible form, no offer, no reason to act now. Your 4.7 stars build trust but there's nothing converting that trust into a booked appointment.

-15%**No CTA funnel means 3–4 ready-to-buy visitors walk every week.**

300 visitors × 15% no-CTA loss = 45 × 25% conv = 11 leads × 30% close = 3 jobs × \$5,500 = \$16,500 — conservative estimate: \$3,800–\$5,500/mo.

WHAT'S HAPPENING

There's no above-the-fold offer, no free estimate form, and no urgency trigger — just a phone number hoping people notice it.

HVAC buyers compare 2–3 companies. Without a form or hook, you lose the ones who aren't ready to call but are ready to inquire.

HOW TO FIX IT

01 Add Above-the-Fold CTA

Place 'Get a Free Estimate' form or button in the first screen on desktop and mobile — no scrolling required.

02 Create Urgency Offer

Add a seasonal hook like '\$89 tune-up this month only' to trigger immediate action from fence-sitters.

WHAT YOU'LL GET

More inbound leads captured before visitors bounce to a competitor.

Time: 3h · Difficulty: Easy

STORY 04 REVIEWS NOT SHOWCASED

359 Stars, Zero Spotlight

You have 359 reviews averaging 4.7 stars — that's a weapon. But your homepage doesn't show them. Visitors don't see social proof before deciding to call.

-10%

Hidden reviews mean prospects leave to check Google instead of calling.

300 visitors × 10% trust-gap loss = 30 × 25% conv = 7 leads × 30% close = 2 jobs × \$5,500 = \$11,000 — conservative: \$2,200–\$3,300/mo.

WHAT'S HAPPENING

When a homeowner hits your site and doesn't immediately see proof that 359 people trusted you, their default is to Google you — and that's where you lose them.

Competitors with fewer reviews but visible testimonials on-site convert better because trust is shown, not assumed.

HOW TO FIX IT

- 01

Embed Google Reviews Widget

Add a Google review widget or manually pull 5–6 reviews onto the homepage above the fold.
- 02

Add Review Count to Header

Display '4.7 ★ | 359 Reviews' near your phone number — instant credibility signal.

WHAT YOU'LL GET

Visitors see social proof immediately, trust faster, and call without leaving to verify.

Time: 2h · Difficulty: Easy

Google Can't Rank Blank

Without service-specific landing pages and local keyword content, Google has nothing to rank you for beyond your brand name. You're invisible to new customers.

-20%

Thin content means you're not appearing for high-intent Toledo HVAC searches.

Estimated 60–80 monthly organic visits lost × 25% conv = 18 leads × 30% close = 5 jobs × \$5,500 = \$27,500 — conservative: \$4,100–\$6,600/mo.

WHAT'S HAPPENING

Searches like 'furnace installation Toledo OH' or 'AC repair near me' require dedicated, keyword-rich pages — if you don't have them, a competitor with inferior reviews outranks you.

Without content, you're 100% dependent on referrals and repeat customers — a ceiling with no growth engine.

HOW TO FIX IT

- 01

Build Service Landing Pages

Create individual pages for Furnace Install, AC Repair, Heat Pump, and Tune-Up — each targeting Toledo-specific keywords.
- 02

Add Location-Specific Copy

Include 'Toledo, OH,' 'Lucas County,' and nearby neighborhoods naturally in page text and title tags.

WHAT YOU'LL GET

Organic traffic from high-intent buyers who are actively searching for exactly what you offer.

Time: 1–2 weeks · Difficulty: Medium

TIME TO STOP THE BLEEDING.

Glass City has the reviews, the reputation, and the team. The website is the leak. Fix these 5 issues and you're looking at 6–10 more booked jobs a month. Let's close the gap.
