MOBILE VIEW

STORY 01 9.6S LOAD TIME

Site Loads. Leads Don't.

A 9.6-second load time kills 53% of mobile visitors before they see your phone number. Every second over 3s costs you conversions.

-35%**Slow pages bleed your highest-intent traffic.**

400 visitors × 35% lost = 140 × 15% conv × 30% close = 6 jobs × \$8,000 = \$48,000 annualized.

WHAT'S HAPPENING

Your site takes 9.6 seconds to load — Google's threshold for bounce is 3s.

Every lost visitor is a \$8,000 roofing job that called your competitor instead.

HOW TO FIX IT

01 Compress & Cache

Install a caching plugin, compress all images to WebP, and enable a CDN like Cloudflare.

02 Audit Heavy Scripts

Remove or defer any third-party scripts (chat widgets, trackers) inflating load time.

WHAT YOU'LL GET

Cut load time under 3s and recover 30%+ of currently bouncing visitors.

Time: 4h · Difficulty: Medium

STORY 02 NOT MOBILE-FRIENDLY

Phone Users Bounce Fast.

70%+ of local service searches happen on mobile. Your site isn't optimized for it. That means broken layouts, tiny buttons, and zero calls.

-30%

Half your traffic gets a broken experience.

300 mobile visitors × 30% lost = 90 × 15% conv × 30% close = 4 jobs × \$8,000 = \$32,000/yr lost.

WHAT'S HAPPENING

Google penalizes non-mobile-friendly sites in local search rankings — you're losing visibility and visitors simultaneously.

A user who can't tap your phone number on mobile is a customer who calls the next result.

HOW TO FIX IT

- 01

Responsive Redesign

Switch to a mobile-first responsive theme or rebuild key pages in a page builder with mobile preview.
- 02

Sticky Click-to-Call

Add a fixed bottom bar with your phone number visible on every mobile page.

WHAT YOU'LL GET

Mobile leads start converting instead of bouncing — expect 3–5 more calls per week.

Time: 6h · Difficulty: Medium

STORY 03 NO VISIBLE CTA ABOVE FOLD

Nobody Knows to Call.

If visitors land and don't immediately see a phone number or form above the fold, they leave. Friction kills roofing leads fast.

-20%**Invisible CTAs mean invisible revenue.**

400 visitors × 20% CTA friction = 80 lost × 15% × 30% close = 3-4 jobs × \$8,000 = \$24,000-\$32,000/yr.

WHAT'S HAPPENING

Your homepage hero lacks a bold, immediate call-to-action — phone number and quote button must be unmissable.

Roofing buyers decide in seconds; if they have to scroll to find how to contact you, most won't.

HOW TO FIX IT**01 Hero CTA Button**

Place a high-contrast 'Get Free Estimate' button and phone number in the first viewport of the homepage.

02 Repeat CTA Mid-Page

Add a second CTA block halfway down with urgency copy like 'Don't let damage spread — call today.'

WHAT YOU'LL GET

Higher click-to-call rate; more quotes booked per 100 visitors.

Time: 2h · Difficulty: Easy

Google Can't Rank You.

No visible title tags, H1 structure, or service-area keywords detected. You're invisible to people searching 'roofing Toledo OH' right now.

-25%

Organic traffic you're not getting costs \$10K+ per year.

100 additional organic visitors/mo × 15% conv × 30% close = 4-5 jobs × \$8,000 = \$32,000–\$40,000/yr upside.

WHAT'S HAPPENING

Without proper H1 tags, meta titles, and city-service keyword targeting, Google has no reason to rank you above competitors.

Your 208 reviews and 4.8 stars deserve page-1 placement — the SEO foundation just isn't there yet.

HOW TO FIX IT

- 01

Optimize Title & H1 Tags

Set every page title to '[Service] in Toledo, OH | Salgau Roofing' and match the H1 accordingly.
- 02

Create Service + City Pages

Build dedicated pages for 'Roof Replacement Toledo,' 'Roof Repair Toledo,' etc. with 500+ words each.

WHAT YOU'LL GET

More page-1 rankings for high-intent local searches driving free inbound leads.

Time: 8h · Difficulty: Medium

Social Proof Left Offline.

You have 208 five-star reviews and they're not on your site. Visitors who don't know you need that proof before they call.

-15%

Hidden reviews = lower close rate on warm traffic.

Improving on-site trust lifts conv 10–15%; on 400 visitors that's 2–3 more jobs/mo = \$16,000–\$24,000/yr.

WHAT'S HAPPENING

208 reviews averaging 4.8 stars is a powerful trust signal — displaying zero of them on your homepage wastes that asset.

Competitors with fewer reviews but a testimonial section will convert more of your shared traffic.

HOW TO FIX IT

- 01

Embed Google Reviews Widget

Add a Google Reviews widget or static testimonial block to the homepage showing your top 6–8 reviews.
- 02

Add Review Count to Hero

Place '★ 4.8 | 208 Google Reviews' directly in the homepage header next to your phone number.

WHAT YOU'LL GET

Visitors convert faster when they see proof before they have to ask for it.

Time: 1h · Difficulty: Easy

TIME TO STOP THE BLEEDING.

You've got 208 five-star reviews and a crew that delivers. The website is the only thing letting you down. Fix these 5 issues and you stop handing jobs to competitors for free.
