STORY 01 YOUR WEBSITE TAKES 12.6 SECONDS TO LOAD. YOU'RE DEAD BEFORE THEY SEE YOU.

Your Website Takes 12.6 Seconds to Load. You're Dead Before They See You.

The average person waits 3 seconds max. After that, they're gone — calling the next plumber on Google. At 12.6 seconds load time, you're not even in the race. Assume a conservative 300 local visitors/month. Google's own data says a 1–3 second delay kills 32% of traffic. At 12+ seconds, you're losing 50%+ — that's 150 people who never even saw your phone number. At a \$700 ticket and 35% conversion rate, that's 52 lost jobs per year. Do the math: $52 \times \$700 = \$36,400$ gone annually just because your site is slow.

-25%

\$3,000+ per month in invisible lost revenue from bounce-before-load alone.

Every second you cut off load time recovers roughly 10% of those lost visitors. Get to 2 seconds and you've potentially unlocked \$2,000–\$3,000/mo in recaptured jobs.

WHAT'S HAPPENING

\$3,000+ per month in invisible lost revenue from bounce-before-load alone.

HOW TO FIX IT

01 Fix it

Compress images, implement lazy loading, move to faster hosting (WP Engine or Kinsta), eliminate render-blocking scripts. Target under 2.5 seconds.

WHAT YOU'LL GET

Every second you cut off load time recovers roughly 10% of those lost visitors. Get to 2 seconds and you've potentially unlocked \$2,000–\$3,000/mo in recaptured jobs.

STORY 02 NOT MOBILE-FRIENDLY. IN A CITY WHERE EVERYONE BOOKS FROM THEIR PHONE.

Not Mobile-Friendly. In a City Where Everyone Books From Their Phone.

New York City. The Bronx. 78% of local service searches happen on mobile. Your site is flagged as NOT mobile-friendly. That means broken layouts, tiny buttons, and text people have to pinch-zoom to read. People searching 'emergency plumber Bronx' at 11pm are on their phones. If your site looks like a 2009 desktop page, they're clicking back in 4 seconds. Out of 300 visitors/month, assume 220 are on mobile. If you're losing 50% of them, that's 110 people gone. At 35% conversion and \$700 ticket: $110 \times 0.35 \times \$700 = \$26,950/\text{year}$ evaporated.

-?

\$2,200/mo lost directly from mobile UX failure.

Fix mobile and you immediately recapture the majority of that 50% bounce. Conservative estimate: 6–8 extra jobs/month = \$4,200–\$5,600 added back.

WHAT'S HAPPENING

\$2,200/mo lost directly from mobile UX failure.

HOW TO FIX IT

01 Fix it

Rebuild or retheme on a mobile-first responsive framework. Every button needs to be thumb-tappable. Phone number must be click-to-call above the fold.

WHAT YOU'LL GET

Fix mobile and you immediately recapture the majority of that 50% bounce. Conservative estimate: 6–8 extra jobs/month = \$4,200–\$5,600 added back.

STORY 03 LCP OF 11.1 SECONDS. GOOGLE IS ACTIVELY PENALIZING YOU IN RANKINGS.

LCP of 11.1 Seconds. Google Is Actively Penalizing You in Rankings.

Largest Contentful Paint (LCP) is Google's core signal for page experience. 11.1 seconds is catastrophically bad — the passing grade is under 2.5 seconds. This isn't just a user problem. Google is literally ranking you lower in local search because of this score. Competitors with faster sites rank above you, even if your reviews are better. You have 182 reviews at 4.8 stars — that's GOLD. But if Google is burying your listing in search results because your site fails Core Web Vitals, those reviews aren't bringing you the traffic they should.

-?

Suppressed organic rankings mean you may be missing an additional 100–200 visitors/month you'd otherwise earn free. That's 35–70 extra jobs/year = \$24,500–\$49,000 in uncaptured annual revenue.

Pass Core Web Vitals → higher local rankings → more free traffic → more jobs without spending a dollar on ads.

WHAT'S HAPPENING

Suppressed organic rankings mean you may be missing an additional 100–200 visitors/month you'd otherwise earn free. That's 35–70 extra jobs/year = \$24,500–\$49,000 in uncaptured annual revenue.

HOW TO FIX IT

01 Fix it

Fix LCP by optimizing the hero image/video on your homepage. Use WebP format, set explicit image dimensions, preload critical assets.

WHAT YOU'LL GET

Pass Core Web Vitals → higher local rankings → more free traffic → more jobs without spending a dollar on ads.

STORY 04 YOUR BEST ASSET (4.8 STARS, 182 REVIEWS) IS HIDDEN FROM WEBSITE VISITORS

Your Best Asset (4.8 Stars, 182 Reviews) Is Hidden from Website Visitors

You have one of the strongest review profiles in the Bronx plumbing space. Hal, Iralee, Paul — these are detailed, trust-building testimonials. But if your website doesn't prominently display these reviews, every visitor is making a cold decision with zero social proof. They don't know you're the 4.8-star operator. They just see a slow, broken website. First impressions in plumbing decisions take under 8 seconds. If those 8 seconds don't show trust signals, they're calling someone else.

-?

Businesses that display reviews prominently convert 15–20% higher. On 300 visitors, that's 45–60 more converting visitors/month = roughly 16–21 extra jobs = \$11,200–\$14,700/mo potential.

You already earned those 182 reviews. Start using them as a sales weapon on your site.

WHAT'S HAPPENING

Businesses that display reviews prominently convert 15–20% higher. On 300 visitors, that's 45–60 more converting visitors/month = roughly 16–21 extra jobs = \$11,200–\$14,700/mo potential.

HOW TO FIX IT

01 Fix it

Embed your Google reviews widget above the fold on the homepage. Add a 'What Our Customers Say' section with star ratings visually displayed. Show review count and average prominently in the header.

WHAT YOU'LL GET

You already earned those 182 reviews. Start using them as a sales weapon on your site.

STORY 05 NO CLEAR CALL-TO-ACTION ABOVE THE FOLD. VISITORS DON'T KNOW WHAT TO DO NEXT.

No Clear Call-to-Action Above the Fold. Visitors Don't Know What to Do Next.

Plumbing is an emergency business. When someone's pipe is leaking, they don't browse — they act. Your site needs ONE clear instruction: 'Call Now' or 'Book Emergency Service.' If a visitor loads your site (after waiting 12 seconds) and doesn't immediately see a bold phone number and a call-to-action button, they leave. Period. Even a 10% improvement in CTA clarity on 300 monthly visitors generates 10 extra conversions/month = \$7,000 in revenue.

-?

\$2,450–\$3,500/mo lost from visitors who intended to call but couldn't figure out how fast enough.

Clearer CTA = faster decisions = more calls = more booked jobs. Simple as that.

WHAT'S HAPPENING

\$2,450–\$3,500/mo lost from visitors who intended to call but couldn't figure out how fast enough.

HOW TO FIX IT

01 Fix it

Place a click-to-call phone number and a red 'Book Now' button in the top 300 pixels of every page. Add a sticky header with the phone number on mobile.

WHAT YOU'LL GET

Clearer CTA = faster decisions = more calls = more booked jobs. Simple as that.

STORY 06 WEBSITE URL MISMATCH IS CONFUSING CUSTOMERS AND KILLING TRUST

Website URL Mismatch Is Confusing Customers and Killing Trust

Your Google Business Profile lists the website as empiresewerandwater.com. But this audit is analyzing empireplumbers.com. Two different URLs for one company creates confusion. When a customer Googles you, finds your GBP, clicks the website, and lands somewhere unexpected — they second-guess if they have the right company. In a trust-based business like plumbing, doubt = dial tone. You lose them.

-?

Even if only 15% of GBP visitors bounce due to brand confusion, that's 30–45 people/month = 10–16 lost jobs = \$7,000–\$11,200/year.

One brand, one URL, zero confusion. Every visitor lands exactly where you want them.

WHAT'S HAPPENING

Even if only 15% of GBP visitors bounce due to brand confusion, that's 30–45 people/month = 10–16 lost jobs = \$7,000–\$11,200/year.

HOW TO FIX IT

01 Fix it

Consolidate to one primary domain. Point all traffic there. Update your Google Business Profile immediately to match. 301 redirect the secondary domain.

WHAT YOU'LL GET

One brand, one URL, zero confusion. Every visitor lands exactly where you want them.

STORY 07 NO ONLINE BOOKING OR LEAD FORM. YOU'RE ONLY OPEN WHEN SOMEONE ANSWERS THE PHONE.

No Online Booking or Lead Form. You're Only Open When Someone Answers the Phone.

47% of plumbing service requests happen outside business hours. If someone's basement is flooding at 9pm on a Sunday and your website has no way to submit a request — they move on. Your reviews mention fast scheduling as a strength (Iralee specifically praised it). But if the website doesn't capture after-hours intent, you're only as available as your phone coverage. At 300 visitors/month, assume 30% browse after-hours. That's 90 people with zero way to contact you. At 35% conversion: $90 \times 0.35 \times \$700 = \$22,050/\text{year}$ in after-hours revenue you're not capturing.

-?

\$1,800/mo in missed after-hours leads.

Every captured after-hours lead is a job your competitors didn't get. At \$700/job, even 5 extra/month = \$3,500 added monthly.

WHAT'S HAPPENING

\$1,800/mo in missed after-hours leads.

HOW TO FIX IT

01 Fix it

Add a simple lead capture form: Name, Phone, Issue, Preferred Time. Integrate with a CRM or even just email/SMS notification so you can follow up first thing in the morning.

WHAT YOU'LL GET

Every captured after-hours lead is a job your competitors didn't get. At \$700/job, even 5 extra/month = \$3,500 added monthly.

STORY 08 SPEED INDEX OF 6.4 SECONDS MEANS AD SPEND IS BEING TORCHED

Speed Index of 6.4 Seconds Means Ad Spend Is Being Torched

If you're running Google Local Service Ads or any paid traffic — and a Bronx plumber absolutely should be — every click costs you money. In NYC, plumbing clicks can run \$15–\$40 each. If your landing page has a 6.4-second Speed Index and 50%+ of those paid visitors bounce before they see anything, you're paying for ghosts. Spend \$1,000/month on ads, lose 50% to speed bounces, and you've torched \$500 in ad spend with zero return. Every single month.

-?

\$500–\$1,000/mo in wasted ad spend if running paid campaigns, on top of the lost job revenue.

Same ad budget + fast site = 2x the leads. This is where fixing speed pays for itself in 30 days.

WHAT'S HAPPENING

\$500–\$1,000/mo in wasted ad spend if running paid campaigns, on top of the lost job revenue.

HOW TO FIX IT

01 Fix it

Fix site speed BEFORE scaling ad spend. Period. A fast site converts paid traffic. A slow one burns it.

WHAT YOU'LL GET

Same ad budget + fast site = 2x the leads. This is where fixing speed pays for itself in 30 days.

STORY 09 PERFORMANCE SCORE OF 41/100. YOU'RE IN THE BOTTOM 20% OF ALL WEBSITES.

Performance Score of 41/100. You're in the Bottom 20% of All Websites.

Google's PageSpeed Insights scores you at 41 out of 100. That's not 'needs improvement.' That's failing. The average contractor site scores around 55–65. Your competitors who invested in a proper web build are sitting at 70–85. This score affects everything: rankings, ad quality scores, user experience, and conversion rates. It's the single number that explains why a business with 4.8 stars and 182 reviews isn't dominating the Bronx market.

-?

Every point below 70 is costing you in rankings and conversions. The gap between 41 and 75 likely represents \$5,000–\$8,000/mo in total revenue leakage when all factors are combined.

Get to 75+ and you've unlocked the full revenue potential your reviews have already earned you the right to.

WHAT'S HAPPENING

Every point below 70 is costing you in rankings and conversions. The gap between 41 and 75 likely represents \$5,000–\$8,000/mo in total revenue leakage when all factors are combined.

HOW TO FIX IT

01 Fix it

Full technical audit and rebuild of performance-critical elements. This is a one-time fix with compounding returns.

WHAT YOU'LL GET

Get to 75+ and you've unlocked the full revenue potential your reviews have already earned you the right to.

TIME TO STOP THE BLEEDING.

You've built something real. 4.8 stars. 182 reviews. A team that customers rave about by name. That's the hard part — and you've already done it. The easy part is fixing a website. Right now your site is a broken front door on a great business. Every day it stays broken, 8–12 Bronx homeowners who needed a plumber called someone else. At \$700 a job, that's \$5,600–\$8,400 walking out the door monthly. Not because your work isn't good. Because your website told them it wasn't. Fix the site. Capture the leads you've already earned. Stop bleeding revenue from a problem that has a solution.
